Dinex Recon RX

Reconditioned Euro 6 DPF Filters

Dinex.net

Increasing DPF filter business

With the introduction of Dinox Recon RX - a complete program of reconditioned DPF exchange filters - Dinox is now able to offer our customers new and reconditioned DPF filters for the increasing Euro 6 market.

To match the Euro 6 market requirements all Dinox DPF filters are type approved and only type approved DPF filters will be accepted in the Dinox Recon RX program.

New and reconditioned DPF filters are continuously released and made available via the Dinox WebShop and in the online Dinox Euro 6 catalogue.

The same Dinox article number system applies for new DPF filters and reconditioned DPF filters having a +RX suffix.

Easy Box-Box solution

The ready-to-install Dinox Recon RX DPF filters are boxed for easy transportation and stocking. The same box is used for the return of the used DPF filters.

For easy installation, the Dinox Recon RX DPF filter and new Dinox DPF filter boxes includes both the clamps and gaskets.

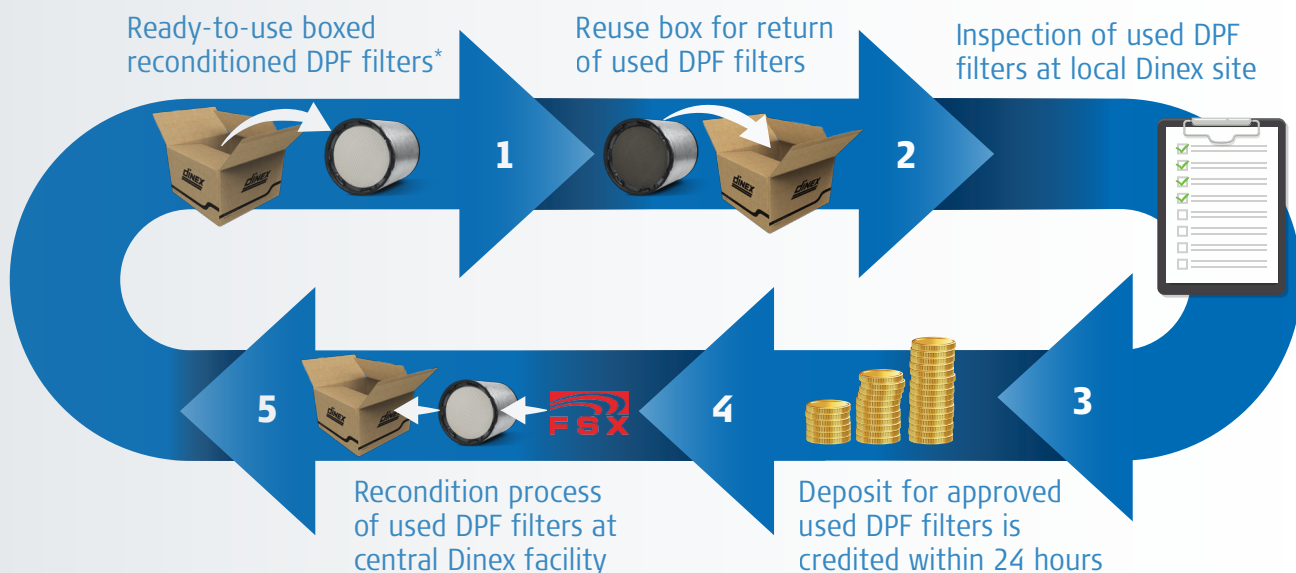

Fast exchange service

Dinox Recon RX DPF filters eliminates the waiting and down-time cost of a normal DPF filter cleaning process with the fast 1:1 exchange installation.

The extensive European Dinox warehouse coverage supports our customers with local availability and logistics to ensure a fast and effective service of new Dinox or reconditioned Dinox Recon RX DPF filters.

Type Approved used DPF Filters are returned to local Dinox warehouses for inspection and deposit crediting. This turnaround service is completed within only 24-hours from receipt of used DPF filters.

*Clamps and gaskets included

Safe 3-step process

All Dinex Recon RX DPF exchange filters are reconditioned to the most comprehensive process available in the market. This process is carried out on FSX equipment and is according to the full FSX 3-step cleaning and reconditioning process.

Both the FSX process and the equipment is approved and used by OE manufacturers.

Normal cleaning includes only step-1 and step-2 using pneumatic and thermal cleaning to remove loose ash and to partly remove hardened ash.

The actual reconditioning process is step-3 where chemicals dissolves hardened ash and restores the catalytic performance. For a good as new performance.

Choice of DPF filters

	CLEANING	RECON	NEW
Ranking	Low cost	Best Value	High Quality
Price	Lower	Competitive	Higher
Downtime	24-48 hours	Instant	Instant
Availability	24-48 hours	In stock	In stock
Warranty	Non	2 years	3 years
Type approved cores only	No	Yes	Yes
Clamps and gaskets included	No	Yes	Yes
Service Intervals	Shorter	Medium	Longer
Regenerations	Often	Medium	Lower
Fuel Economy	Lower	Medium	Higher
Back pressure	Higher	Medium	Lower

Offering both new and reconditioned DPF filters, Dinex allows customers to choose according to their specific requirements. Whether these are new or reconditioned Dinex DPF filters, our European Dinex distribution set-up is fast and efficient to deliver you a reliable service which is backed by your local Dinex organisation.

The Dinex Recon RX program is the EASY, FAST and SAFE choice for DPF exchange filters.
